SUMMARY

Senior Full-Stack Engineer with **7 years** shipping production **Node.js + React** systems — web, mobile (React Native), and backend, often from a single codebase philosophy. Led a **3-engineer team** delivering a healthcare platform across React.js web, React Native mobile, and a custom smartwatch on one Node.js backend — **+25% performance**, **-35% bug reports**; rebuilt a customer-facing Admin Portal's React UI end-to-end with a 4-tier RBAC redesign — **-30% API latency**, **+40% adoption**. Owns both sides of the wire, from API design through component architecture.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, React Native, Redux, Context API, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT Auth, BullMQ, Microservices, System Design, Python, FastAPI
AI & GenAI	Groq API, Llama 3.3, MCP Protocol, LangChain, RAG Pipelines, Prompt Engineering
Data & DevOps	PostgreSQL, MySQL, MongoDB, Redis, AWS (EC2 · S3 · Lambda), Docker, CI/CD, Nginx, Git

WORK EXPERIENCE

Senior Full-Stack Developer — Evren Jan 2023 – Present

- Rebuilt the customer-facing **Admin Portal** (V2, new React UI from scratch) plus an internal Support Portal — **Python → Node.js migration**, 4-tier RBAC redesign, FastAPI CRUD layer — delivered **-30% API latency**, **+40% portal adoption**, **-50% debug time**, zero downtime
- Designed & shipped production AI systems on Groq Llama 3.3 — a support chatbot auto-resolving **72% of tier-1 tickets** at 99.7% uptime, and an **MCP-based agent workflow engine** (idempotency keys, dry-run simulation, audit trail) running **18+ months** in production
- Owned end-to-end technical architecture across backend, AI, and frontend; mentored developers through structured code reviews and system design sessions

Full-Stack Developer & Team Lead — Bestpeers Infosystem Jul 2021 – Dec 2022

- Led a **3-engineer team** shipping a healthcare monitoring platform across **React.js web**, **React Native mobile**, and a custom smartwatch (HR, SpO2, GPS) — shared Node.js + MySQL backend, single JWT auth contract; delivered **+25% performance** over the prior system
- Applied **Redux**, **Context API**, and custom hooks for performant, scalable frontend architecture; resolved memory leaks, N+1 queries, and security vulnerabilities during development, not after ship
- Established architecture standards and code-review gates driving **35% fewer bug reports**; mentored junior devs on system design, performance patterns, and scalable state management

Software Developer — FIS Global (Worldpay) Aug 2019 – Jun 2021

- Built Selenium CRM regression framework achieving **90%+ workflow coverage**, eliminating **80% of manual QA effort** — full suite runs in <8 min on every CI push
- Engineered fault-tolerant ETL pipeline (MongoDB ↔ Salesforce via SSIS) — **95% data accuracy**, dead-letter queuing, immutable audit trail, replacing all manual weekly reconciliation

PROJECTS

Lex & Ledger React · Node.js · MongoDB · Groq AI · JWT · AWS S3 Legal & financial marketplace connecting users with verified lawyers and CAs (User / Expert / Admin roles) — booking, WhatsApp notifications, AI document processing; client-to-expert matching under 2 min	Livoh.in React · TypeScript · Express · Prisma · PostgreSQL · AWS S3 Full-stack home decor e-commerce — OTP auth, 50+ SKU catalog, cart & checkout, shipping integration, automated GST invoice generation on every order
Sunpress Organic React · Node.js · PostgreSQL · PWA End-to-end ERP (offline-capable PWA) for an edible oil manufacturing unit — sourcing, production, orders, payments, employee & salary management, and stock control in one app; also built & maintain the company's public marketing site as a separate project	PlotSync React Native · Node.js · MongoDB Real estate plot management for tier-3 Indian cities — eliminates double-booking across 200+ plots, real-time availability visibility for developers and field sales teams

ENGINEERING APPROACH

Ownership	I don't hand off to "the frontend team" or wait on "the infra team" — end-to-end ownership means I debug across the entire system and ship without blockers
Clarity	Code that reads clearly is cheaper to maintain, faster to debug, and easier to hand off — I write for the engineer who comes after me, because that engineer is often me

EDUCATION & CERTIFICATIONS

RGPV University, LNCT College 2015–2019	MongoDB Developer Certification
Bachelor of Engineering — Computer Science	MongoDB, Inc. · 2021
