

KARTIKEY GUPTA

SENIOR FULL-STACK DEVELOPER · NODE.JS · BACKEND ENGINEER

+91-9695173723 · kartikeygupta8@gmail.com · github.com/kartikeygupta8 · linkedin.com/in/kartikeyguptadev · kartikeygupta.co · India (UTC+5:30) · Open to remote roles

SUMMARY

Senior Full-Stack & Backend Engineer with **7 years** building production Node.js systems across Fortune-500 fintech, healthcare SaaS, and enterprise software. Led a **Python → Node.js migration** cutting API latency **30%**; layered AI on top as reliable infrastructure — a Groq Llama 3.3 chatbot auto-resolving **72% of tier-1 tickets**, and a production **MCP agent workflow engine** (idempotency keys, dry-run simulation, full audit trails) running **18+ months** incident-free. Led a 3-engineer cross-platform team delivering web, mobile, and wearable from a single Node.js backend.

TECHNICAL SKILLS

Backend	Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT Auth, BullMQ, Microservices, System Design, Python, FastAPI
AI & GenAI	MCP Protocol, Groq API, Llama 3.3, Claude API, Ollama, LangChain, RAG Pipelines, AI Agents, Agentic Workflows, Prompt Engineering, Function Calling
Frontend	React.js, Next.js, TypeScript, React Native, Redux, Tailwind CSS, Framer Motion
Data & DevOps	PostgreSQL, MySQL, MongoDB, Redis, SSIS, ETL Pipelines, SQL Optimization, AWS (EC2 · S3 · Lambda), Docker, CI/CD, Nginx, Git

WORK EXPERIENCE

Senior Full-Stack Developer — Evren Jan 2023 – Present

- Owned end-to-end technical architecture — led cross-functional engineering decisions across backend, AI, and frontend; mentored developers through structured code reviews and system design sessions
- Led **Python → Node.js migration** and rebuilt the customer-facing **Admin Portal** (V2, from scratch) plus an internal Support Portal on MySQL — new React UI, 4-tier RBAC redesign, kept a FastAPI service layer for CRUD DB operations — delivered **–30% API latency**, **+40% portal adoption**, –50% debug time, zero downtime
- Designed & shipped production AI systems on Groq Llama 3.3 — a support chatbot auto-resolving **72% of tier-1 tickets** at 99.7% uptime and **1.2s median response time**, and an **MCP-based agent workflow engine** (idempotency keys, dry-run simulation, PostgreSQL audit trail) running **18+ months** in production, reclaiming **6h+/week** of manual ops

Full-Stack Developer & Team Lead — Bestpeers Infosystem Jul 2021 – Dec 2022

- Led a **3-engineer team** shipping a healthcare monitoring platform across React.js web, React Native mobile, and a custom smartwatch (HR, SpO2, GPS) — shared Node.js + MySQL backend, single JWT auth contract; delivered **+25% performance** over the prior system
- Established architecture standards and code-review gates driving **35% fewer bug reports**; mentored junior devs on system design, performance patterns, and scalable state management
- Resolved memory leaks, N+1 queries, and security vulnerabilities during development, not after ship; applied Redux, Context API, and custom hooks for performant, scalable frontend architecture

Software Developer — FIS Global (Worldpay) Aug 2019 – Jun 2021

- Built Selenium CRM regression framework achieving **90%+ workflow coverage**, eliminating **80% of manual QA effort** — full suite runs in <8 min on every CI push
- Engineered fault-tolerant ETL pipeline (MongoDB ↔ Salesforce via SSIS) — **95% data accuracy**, dead-letter queuing, immutable audit trail, replacing all manual weekly reconciliation
- Optimized complex SQL queries, cutting report-generation latency significantly on financial-scale datasets

PROJECTS

Lex & Ledger

Node.js · React · MongoDB · Groq AI · JWT · AWS S3
Legal & financial marketplace connecting users with verified lawyers and CAs (User / Expert / Admin roles) — booking, WhatsApp notifications, AI document processing; client-to-expert matching under 2 min

Sunpress Organic

Node.js · React · PostgreSQL · PWA
End-to-end ERP (offline-capable PWA) for an edible oil manufacturing unit — sourcing, production, orders, payments, employee & salary management, and stock control in one app; also built & maintain the company's public marketing site as a separate project

Livoh.in

Express · Prisma · PostgreSQL · React · TypeScript · AWS S3
Full-stack home decor e-commerce — OTP auth, 50+ SKU catalog, cart & checkout, shipping integration, automated GST invoice generation on every order

PlotSync

Node.js · React Native · MongoDB
Real estate plot management for tier-3 Indian cities — eliminates double-booking across 200+ plots, real-time availability visibility for developers and field sales teams

ENGINEERING APPROACH

Ownership	End-to-end ownership across the stack — no hand-offs to a separate frontend or infra team; I debug the whole system and ship without blockers
Product	Every 100ms matters — query optimization, caching strategy, and bundle size are product decisions, tracked from day one, not engineering afterthoughts

EDUCATION & CERTIFICATIONS

RGPV University, LNCT College 2015–2019	MongoDB Developer Certification
Bachelor of Engineering — Computer Science	MongoDB, Inc. · 2021
