

KARTIKEY GUPTA

SENIOR BACKEND DEVELOPER · PYTHON · AI/ML ENGINEER

+91-9695173723 · kartikeygupta8@gmail.com · github.com/kartikeygupta8 · linkedin.com/in/kartikeyguptadev · kartikeygupta.co · India (UTC+5:30) · Open to remote roles

SUMMARY

Senior Backend & AI/ML Engineer with **7 years** building production systems in Python (FastAPI) and Node.js across Fortune-500 fintech, healthcare SaaS, and enterprise software. Built Python-based test-automation and ETL pipelines cutting manual QA effort **80%**; later shipped a GenAI support platform (Groq Llama 3.3) auto-resolving **72% of tier-1 tickets**, and a production **MCP agent workflow engine** — idempotency keys, dry-run simulation, full audit trails — running **18+ months** incident-free, reclaiming **6h+/week** of manual ops.

TECHNICAL SKILLS

AI & GenAI	MCP Protocol, Groq API, Llama 3.3, Claude API, Ollama, LangChain, RAG Pipelines, AI Agents, Agentic Workflows, Prompt Engineering, Function Calling
Backend	Python, FastAPI, Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT Auth, BullMQ, Microservices, System Design
Data & DevOps	PostgreSQL, MySQL, MongoDB, Redis, SSIS, ETL Pipelines, SQL Optimization, AWS (EC2 · S3 · Lambda), Docker, CI/CD, Nginx, Git
Frontend	React.js, Next.js, TypeScript, React Native, Redux, Tailwind CSS, Framer Motion

WORK EXPERIENCE

Senior Full-Stack Developer — Evren Jan 2023 – Present

- Built an **AI support chatbot** on Groq Llama 3.3 (streaming) auto-resolving **72% of tier-1 tickets** at 99.7% uptime and **1.2s median response time**; extended into a production **MCP agent workflow engine** — idempotency keys (Redis), dry-run simulation, PostgreSQL audit trail — running **18+ months**, reclaiming **6h+/week** of manual ops
- Led **Python → Node.js migration** on MySQL with 4-tier RBAC redesign, keeping a **FastAPI** service layer handling CRUD database operations — delivered **–30% API latency**, **+40% portal adoption**, and ~50% debug time via structured log-analysis tooling
- Owned end-to-end technical architecture — led cross-functional engineering decisions across backend, AI, and frontend; mentored developers through structured code reviews and system design sessions

Full-Stack Developer & Team Lead — Bestpeers Infosystem Jul 2021 – Dec 2022

- Led a **3-engineer team** shipping a healthcare monitoring platform across React.js web, React Native mobile, and a custom smartwatch (HR, SpO2, GPS) — shared Node.js + MySQL backend, single JWT auth contract; delivered **+25% performance** over the prior system
- Established architecture standards and code-review gates driving **35% fewer bug reports**; mentored junior devs on system design, performance patterns, and scalable state management
- Resolved memory leaks, N+1 queries, and security vulnerabilities during development, not after ship; applied Redux, Context API, and custom hooks for scalable frontend architecture

Software Developer — FIS Global (Worldpay) Aug 2019 – Jun 2021

- Built a **Python**-based Selenium CRM regression framework (Pytest, Page Object Model) — every major user journey automated, **90%+ workflow coverage**, eliminating **80% of manual QA effort**; full suite runs in <8 min on every CI push
- Engineered fault-tolerant ETL pipeline (MongoDB ↔ Salesforce via SSIS) — schema validation, dead-letter queuing, exponential backoff retry, immutable PostgreSQL audit trail — **95% data accuracy**, replacing all manual weekly reconciliation
- Optimized complex **SQL** queries, cutting report-generation latency significantly on financial-scale datasets

PROJECTS

Lex & Ledger

React · Node.js · MongoDB · Groq AI · JWT · AWS S3
Legal & financial marketplace connecting users with verified lawyers and CAs (User / Expert / Admin roles) — booking, WhatsApp notifications, AI document processing; client-to-expert matching under 2 min

Sunpress Organic

React · Node.js · PostgreSQL · PWA
End-to-end ERP (offline-capable PWA) for an edible oil manufacturing unit — sourcing, production, orders, payments, employee & salary management, and stock control in one app; also built & maintain the company's public marketing site as a separate project

Livoh.in

React · TypeScript · Express · Prisma · PostgreSQL · AWS S3
Full-stack home decor e-commerce — OTP auth, 50+ SKU catalog, cart & checkout, shipping integration, automated GST invoice generation on every order

PlotSync

React Native · Node.js · MongoDB
Real estate plot management for tier-3 Indian cities — eliminates double-booking across 200+ plots, real-time availability visibility for developers and field sales teams

ENGINEERING APPROACH

Iteration	A working system in production teaches more in one week than six weeks of design docs — I bias toward shipping something real, then improving it fast
Observability	Structured logging, meaningful error messages, and audit trails are built in from day one, not retrofitted after an incident

EDUCATION & CERTIFICATIONS

RGPV University, LNCT College 2015–2019	MongoDB Developer Certification
Bachelor of Engineering — Computer Science	MongoDB, Inc. · 2021
