

KARTIKEY GUPTA

SENIOR FULL-STACK DEVELOPER · BACKEND · AI INTEGRATION · GENAI ENGINEER
+91-9695173723 · kartikeygupta8@gmail.com · github.com/kartikeygupta8 · linkedin.com/in/kartikeyguptadev · kartikeygupta.co

PROFESSIONAL SUMMARY

Senior Full-Stack Developer and GenAI Engineer with **7 years** building scalable AI-first systems across Fortune-500 fintech, product startups, and SaaS. Shipped an AI support platform auto-resolving **72% of tier-1 tickets without human intervention** at 99.7% uptime; designed MCP agent workflows eliminating **6h+/week of manual ops** with full audit coverage. Led a 3-engineer team at Bestpeers, own the full technical stack from database schema to production deployment, and integrate AI as reliable production infrastructure — not a feature bolted on.

TECHNICAL SKILLS

AI & GenAI	Groq API, Llama 3.3, Claude API, Ollama, MCP Protocol, LangChain, RAG Pipelines, AI Agents, Agentic Workflows, Prompt Engineering, Function Calling
Backend	Node.js, Python, Express.js, REST APIs, GraphQL, Microservices, WebSockets, JWT Auth, BullMQ, Message Queues
Frontend	React.js, Next.js, TypeScript, React Native, Redux, Context API, Tailwind CSS, Framer Motion
Data	PostgreSQL, MySQL, MongoDB, Redis, SSIS, ETL Pipelines, SQL Optimization, Salesforce API
DevOps	AWS (EC2, S3, Lambda), Docker, CI/CD, Git, Nginx
Methods	System Design, Distributed Systems, Agile / Scrum, Technical Roadmap, Code Reviews, Cross-functional Collaboration, Team Mentorship

WORK EXPERIENCE

Senior Full-Stack Developer | Jan 2023 – Present

- Evren**
- Owned end-to-end technical architecture and roadmap — led cross-functional engineering decisions across backend, AI, and frontend layers; mentored developers through structured code reviews and architecture design sessions
 - 72% of tier-1 support tickets auto-resolved without human intervention** — built on Groq Llama 3.3 with streaming completions; extended to agentic workflows for **appointment scheduling, support call booking, and guided multi-step flows**
 - 6h+/week of manual internal ops eliminated** — designed MCP server exposing internal GET endpoints as typed tools; agentic layer executes scheduling and booking workflows with a full immutable audit trail on every action
 - Led **Python → Node.js migration** on MySQL, 4-tier RBAC redesign, and React UI overhaul — delivered **–30% API latency, +40% portal adoption**, and **–50% debug time** via structured log-analysis tooling

Full-Stack Developer & Team Lead | Jul 2021 – Dec 2022

- Bestpeers Infosystem**
- Led a **3-engineer team** shipping a healthcare monitoring platform across web (React.js), mobile (React Native), and a custom smartwatch (HR, SpO2, GPS) — shared Node.js + MySQL backend, single JWT auth contract; delivered **+25% performance** over the prior system
 - Established architecture standards and code review gates that drove a **35% reduction in bug reports**; mentored junior developers on performance patterns, system design, and scalable state management
 - Eliminated memory leaks, N+1 queries, and security vulnerabilities during development; applied Redux, Context API, and memoization for performant, maintainable frontend architecture

Software Developer | Aug 2019 – Jun 2021

- FIS Global (Worldpay)**
- Built Selenium-based **CRM regression automation framework** achieving **90%+ workflow coverage** and eliminating **80% of manual QA effort** — full suite runs in <8 min on every CI push; zero manual regression cycles per release
 - Engineered fault-tolerant **ETL pipeline** bidirectionally syncing MongoDB with Salesforce CRM via SSIS — **95% data accuracy**, dead-letter queuing, immutable audit trail, replacing all weekly manual reconciliation

PROJECTS

Lex & Ledger

React · Node.js · MongoDB · Groq AI · JWT · AWS S3
Legal & financial services marketplace — user-to-expert matching (lawyers, CAs), booking system, WhatsApp notifications, multi-role auth, AI document processing
Reduced client-to-expert matching time to under 2 minutes; supports multi-role workflows across lawyers and CAs

Sunpress Organic

React · Node.js · PostgreSQL
Manufacturing P&L costing tool for edible oil production — tracks seed input, oil/khari yield, overhead allocation, per-unit profitability across pack sizes
Reduced batch costing from ~4 hours of manual spreadsheet work to under 20 minutes per production run

Livoh.in

React · TypeScript · Express · Prisma · PostgreSQL · AWS S3
Full-stack home decor e-commerce — OTP auth, product catalog, cart & checkout, shipping integration, automated GST invoice generation
End-to-end e-commerce with 50+ SKUs, automated GST invoice generation on every order, OTP-secured checkout

PlotSync

React Native · Node.js · MongoDB
Real estate plot management for tier-3 Indian cities — eliminates double-booking conflicts, real-time plot availability for developers and sales teams
Eliminates double-booking conflicts across 200+ plots; real-time availability visibility for field sales teams

EDUCATION

RGPV University, LNCT College | 2015–2019

CERTIFICATIONS

MongoDB Developer Certification
MongoDB, Inc. · 2021
